

The logo for CCTV Solutions, featuring the letters 'c.c.t.v.' in a stylized, italicized, sans-serif font. The letters are white with a blue gradient and a slight shadow effect, giving them a three-dimensional appearance. The dots on the 'i's are also stylized.

c.c.t.v.

solutions.co.uk

The tagline 'CCTV Solutions' is presented in a large, bold, white, sans-serif font. It is contained within a white rectangular border that is part of a larger white-bordered box. The background of the entire page is black with several glowing blue light trails that curve across the frame, ending in bright white circular spots.

CCTV Solutions

Your security is our business

::: ABOUT US

::: CDA are national leaders in CCTV and Access Control.

We're not only ahead in terms of installation, we design and build the systems, too. Which means when we install yours, the chances are we've developed, tested and re-tested it in-house. So no one knows more about our systems than the fully-trained team we send out to install and maintain them.

But their real beauty is how easy to use they are, how they put you in charge.

Our team stays with you until you're happy with how everything works, and that happens more quickly than you'd think;

if you can use a mouse and keyboard, you can use our systems. They might be state-of-the-art, but the hi-tech innovation is only there to serve you, to make life simpler.

Which is why, after ten years in business, we now help protect premises as diverse as schools, garages, tourist attractions, pubs and clubs and industrial sites and, starting from our base in Cornwall, we now cover the whole country.

Why not see what we can do for you ...

::: OUR SERVICES

::: CDA Systems are individually tailored to fit your business

The best system is the combination of hardware and software that works for you. So, to begin with, we'll help you choose cameras which fit your premises.

Will they be indoors or outdoors? Do you want discretion, or to advertise them? Will they be exposed to extremes of sunlight or rain? Are 360 degrees of surveillance needed, or just one angle? We'll help you answer all these questions, so your cameras suit your needs.

But whatever those needs, our Digistore system puts you in complete and easy control.

Use it to view live images, play back events, or have recordings begin on motion detection or at pre-set times. Any of these images can be captured, emailed, or saved to a hard drive or a built-in, recordable dvd player; it's up to you.

From one camera to multiples of 16 (if you need 32, 48, etc.), from single-user to multiple levels of password access; that's up to you, too. We even handle your legal obligations; by law, footage must be deleted after 30 days, our systems do that automatically.

For more detail on how to achieve easy-to-use peace of mind, look at our technical information ...

::: TECHNICAL OVERVIEW

::: Safe from harm

Digital watermarking means your recordings are not just tamper-proof, they're also legally admissible as evidence, too.

::: The best hardware

The most sophisticated software in the world won't help you if your cameras are only capable of substandard or inadmissible images and footage. We offer a wide range of the most reliable and robust hardware available.

::: Security on a scale to suit you

Keep tabs on as many as 16, 32, 48, etc, or as few as one camera, at rates of anything from 16 to 400 frames per second, depending on the application you choose and the level you need.

::: Peace of mind

CDA's systems are supported remotely by us through your broadband; we never leave you in the lurch. If there's ever a problem, we're able to fix it, minimising any system downtime.

::: TESTIMONIALS

::: What some of our customers have to say about us...

"We were extremely impressed with CDA from the start, the picture quality of the cameras is superb and the software used on the Digistore is simple to use. The guys are incredibly knowledgeable, approachable and friendly as well. The work carried out in all areas was done with upmost professionalism; we look forward to working with CDA over the coming years."

Bradfield College & Sports Centre - Reading
www.bradfieldcollege.org.uk

"The digital CCTV system that we had installed by CDA Solutions has proved a superb investment, the remote access function in particular allowing me to sleep easy at night by checking everything is OK before going to bed! In addition the playback feature has allowed us to provide evidence to the police and our insurance companies relating to claims which have been pivotal in deciding the outcomes on several occasions. Without question the product and service provided by CDA Solutions is the future of CCTV and I fully recommend them to anyone."

Adrenaline Motorsport Limited - Cornwall
www.adrenalinemotorsport.co.uk

"Excellent service and quality of installation. We would recommend CDA to anyone."

Crantock Bakery - Indian Queens, Cornwall
www.crantockbakery.co.uk

"Following numerous incidents of anti social behaviour and graffiti within one of our key family-oriented areas, a solution needed to be found. We worked closely with CDA Solutions to provide a state of the art Digital CCTV solution that we feel will both discourage vandals and address the many issues being faced. CDA solutions provided excellent support and advice throughout and provided a practical solution tailored to our specific needs within a tight budget. The installation went seamlessly and we are delighted with the outcome."

Councillor Harrison - Newquay Town Council
www.newquaytowncouncilcornwall.co.uk

"The team were very friendly and helpful. The training received will make the system easy to use. Excellent work in a sensitive school environment, we would definitely recommend CDA to other similar institutions. Many thanks."

Fitzjohn's Primary school - Hampstead, London
www.fitzjohns.camden.sch.uk

"The work carried out by the engineers is of the highest standard. I'm very happy with the excellent installation of our CCTV."
