Access Solutions

Your security is our business

::: ABOUT US

::: CDA are national leaders in CCTV and Access Control.

We're not only ahead in terms of installation, we design and build the systems, too. Which means when we install yours, the chances are we've developed, tested and re-tested it in-house. So no one knows more about our systems than the fully-trained team we send out to install and maintain them.

But their real beauty is how easy to use they are, how they put you in charge.

Our team stays with you until you're happy with how everything works, and that happens more quickly than you'd think;

if you can use a mouse and keyboard, you can use our systems. They might be state-of-the-art, but the hi-tech innovation is only there to serve you, to make life simpler.

Which is why, after ten years in business, we now help protect premises as diverse as schools, garages, tourist attractions, pubs and clubs and industrial sites and, starting from our base in Cornwall, we now cover the whole country.

Why not see what we can do for you ...

::: OUR SERVICES

::: CDA Systems are individually tailored to fit your business

Whatever the premises you want to protect, we have a solution that fits your business and your budget.

From the grounds of a large country home to the entrance of an inner city car-park, from a national heritage site to a jewellery store, we supply gates, barriers and rising bollards, as well as sophisticated vehicle-registration identification software (our own Auto-Spi system) which not only cuts down on the need for round-the-clock staffing, but also records automatically individuals' arrival and departure times.

We design and test ourselves most of the software which operates all these devices

and, as with all our systems, they're created with ease of use in mind, to put you in control.

You might want to add our state-of-the-art features to existing measures, or have us install an entire system to include new hardware and software. Whichever option you choose, you'll receive the kind of service which comes as standard with CDA Solutions: comprehensive, professional and informed, from the first, free quotation right through installation to after-sales.

For more detail on how to achieve easy-to-use peace of mind, look at our technical information ...

::: TECHNICAL OVERVIEW

::: APNR

ANPR (Automated Number Plate Recognition) is a great way to control access to busy car parks and holiday parks.

::: Doors and Intercoms

These operate seamlessly from the moment of installation. Key ring fob, swipe card or PIN number can be used to control door motors and door locks. Control access and exit by individual, group, time, date and a multitude of easily configurable options. Often combinations of options are installed with an intercom for unexpected or unauthorised visitors.

::: GSM Remote

We're constantly improving our access control systems; GSM entry access means you can now enter your property via your mobile phone.

::: Barriers and Gates

From a private home's automated garage door, to barriers for car parks and hydraulic underground motors operating gated access systems, we install a wide variety of systems to put you in charge of entrances and exits.

::: TESTIMONIALS

::: What some of our customers have to say about us...

“Excellent service, the system was explained very clearly. Both engineers were friendly and extremely well informed.”

Shenton Primary School - Leicester
www.shenton.leicester.sch.uk

“The work was carried out extremely efficiently. The engineers were respectful of the school environment and of the children as they moved throughout the school. They were co-operative and always willing to answer questions.”

St Agnes Primary School - London
www.stagnes.oldham.sch.uk

“The engineers were extremely pleasant, helpful and fast. They were in and out with no disruption to the business.”

Henry's Bar - Piccadilly, London
www.henryscafebars.co.uk

“We have found the CDA team to be very professional and knowledgeable.”

Britannia Quick Move Ltd - Calne, Wiltshire
www.britannia-quickmove-removals.com

“Following numerous incidents of anti social behaviour and graffiti within one of our key family-oriented areas, a solution needed to be found. We worked closely with CDA Solutions to provide a state of the art Digital CCTV solution that we feel will both discourage vandals and address the many issues being faced. CDA solutions provided excellent support and advice throughout and provided a practical solution tailored to our specific needs within a tight budget. The installation went seamlessly and we are delighted with the outcome.”

Councillor Harrison - Newquay Town Council
www.newquaytowncouncilcornwall.co.uk

“We have found your engineers extremely hardworking and friendly. They have been a pleasure to work with and we would have no hesitation in recommending CDA.”

Metanoia Institute - Ealing, London
www.metanoia.ac.uk

“Very impressed with the professional attitude and commitment of installers. Delighted with the workmanship and quality of the product.”

Newdigate Infant School - Surrey
